European Journal of Operational Research 110 (1998) 682–684

EUROPEAN JOURNAL OF OPERATIONAL RESEARCH

Contents Volume 110

1 Reacting in real-time to production contingencies in a capacitated flexible cell
A.K. Chakravarty and N. Balakrishnan

20 Optimal myopic policy for a stochastic inventory problem with fixed and proportional backorder costs
S. Çetinkaya and M. Parlar

42 Optimal streaming of a single job in a two-stage flow shop
A. Şen, E. Topalolu and Ö.S. Benli

63 Economic spare capacity planning for DCS mesh-restorable networks
K. Lee, K. Park, S. Park and H. Lee

76 Heuristics for the flow line problem with setup costs
R.Z. Ríos-Mercado and J.F. Bard

99 Stochastic group preference modelling in the multiplicative AHP: A model of group consensus
R.C. Van den Honert

112 A statistical approach to the analytic hierarchy process with interval judgements. (I). Distributions on feasible regions
L.M. Haines

126 Stability analysis and optimization of an inventory system with bounded orders
X. Xie

150 Iterative improvement methods for a multiperiod network design problem
B.-L. Garcia, Ph. Mahey and L.J. LeBlanc

166 Iterative methods based on splittings for stochastic automata networks
E. Uysal and T. Dayar

187 Editorial
M. Salomon

188 HOP: A software tool for production scheduling at Bridgestone/Firestone Off-The-Road
Z. Degraeve and L. Schrage

199 A two-level network for recycling sand: A case study
A.I. Barros, R. Dekker and V. Scholten

215 A model of clinker capacity expansion
T. Stylianides

223 Modeling and solving a real-life assignment problem at universities
M. Čangalović, V. Kovačević-Vujčić, L. Ivanović and M. Dražić

234 A multicriteria decision-making approach to university resource allocations and information infrastructure planning
N.K. Kwak and C. Lee

243 A multi-objective model for locating fire stations
M.A. Badri, A.K. Mortagy and C.A. Alsayed
261 Purchase quantity discounts and open order rescheduling in an assemble-to-order environment: The hidden economic tradeoffs
R. Srivastava and W.C. Benton
272 Simulated annealing for order spread minimization in sequencing cutting patterns
H. Foerster and G. Wäscher
282 An investigation of the behavior of simulation response surfaces
A.G. Greenwood, L.P. Rees and F.C. Siochi
314 A variant of time minimizing assignment problem
S. Arora and M.C. Puri
326 Constrained games, intervening duality and experimenter–experiment interactions
M.J. Ryan
342 A Weight-assessing method with habitual domains
G.-H. Tzeng, T.-Y. Chen and J.-C. Wang
368 Axioms for the Shapley value on convex geometries
J.M. Bilbao
377 The fuzzy hyperbolic inequality index associated with fuzzy random variables
M.A. Gil, M. López-díaz and H. López-garcía
392 Analysis of multi-server queues with station and server vacations
X. Chao and Y.Q. Zhao
407 Book Reviews
H. Fleuren (ed.)
409 Call for Papers

411 Manufacturing planning and control: The evolution of MRP and JIT integration
W.C. Benton and H. Shin
441 The course scheduling problem at Lufthansa Technical Training
K. Haase, J. Latteier and A. Schirmer
457 Domestic petroleum-related expertise utilization and Nigeria's oil industry survival: A multicriteria decision analysis
T.Ch.U. Kalu
474 Cost optimal allocation of rail passenger lines
M.T. Claessens, N.M. van Dijk and P.J. Zwaneveld
490 Modeling action-interdependence in multiple criteria decision making
S. Rajabi, D.M. Kilgour and K.W. Hipel
509 The use of genetic algorithms to solve the economic lot size scheduling problem
M. Khouja, Z. Michalewicz and M. Wilmot
525 Hybrid heuristics for the capacitated lot sizing and loading problem with setup times and overtime decisions
L. Özdamar and S.I. Birbil
548 A hybrid heuristic and linear programming approach to multi-product machine scheduling
J.F. Gonçalves and R.C. Leachman
564 Heuristic and exact methods for the cutting sequencing problem
E. Faggioli and C.A. Bentivoglio
576 Explicit results for a class of asset-selling problems
I. David

585 Asymptotic loss of priority scheduling policies in closed re-entrant lines: A computational study
Y. Narahari and L.M. Khan

597 Dynamic facility location when the total number of facilities is uncertain: A decision analysis approach
J. Current, S. Ratick and C. ReVelle

610 An exact depth-first algorithm for the pallet loading problem
S. Bhattacharya, R. Roy and S. Bhattacharya

626 Balancing stocks, flexible recipe costs and high service level requirements in a batch process industry: A study of a small scale model
W.G.M.M. Rutten and J.W.M. Bertrand

643 Nonparametric measurement of productive efficiency in the presence of regulation
G. Granderson and C. Linvill

658 Analysis of expected queueing delays for decision making in production planning
R. Kuik and P.F.J. Tielemans
